Forest Home Cemetery Records 1930-1942
Oneida County
Rhinelander, Wisconsin

The cemetery book is in very fragile condition, and handwriting and spelling is bad. Every effort has been made to copy this information as it appears in the book, however in some cases it was impossible to determine what was written. During the transcribing of the cemetery books it became apparent that some of these books had overlapping years and data. It also appears that this book and the book 1919-1936 were written in most of the same handwriting which leads one to believe that these books were copied from something else.

This information was entered into the book by year, starting with January 1930. Because there was no formal page numbering in the book, we did do an Index by Surname so you can do lookups by Surname, then go to the year in the transcribed information to find the details associated with that burial.

The Northwoods Genealogical Society and Rhinelander District Library are in no way liable for the contents or accuracy of the information.
